Type HS 180

In comparison to the more affordable *HS 140*, the *HS 180* is more powerful and lighter. Equipped with a 180 mm blade as well as a LED operating display, the *HS 180* is especially useful for cutting polystyrene hard foam (DIN 4102). It can be used for straight or round U-cuts, for pipe and cable embedding as well as for clean cuts for ceiling or wall panels. Measured cuts on gable or pediments, difficult round cuts (for example electrical outlets) and various cuts on foam pipe insulation can be performed effortlessly. The hot knife is delivered with a practical suspension clip and a wire brush to clean the blade in a protecting plastic case.

SPECIFICATIONS

- Including 180-mm-blade and plastic case
- Protective insulation
- Power cord: 3 m long, Europlug
- No creation of cutting dust
- No creation static electricity

TECHNICAL DATA

- Cutting length: 180 mm
- Time to heat: 6-8 seconds
- Voltage:
  230 V - 50 Hz (110 V - 60 Hz)
- Power: max. 200 W
- On/Off Usage: 12s On / 48s Off
- Cutting temperature max. 500 °C
- Weight: 450 g
- LED-Operating Indicator

POSSIBLE CUTS

PRICES (excluding tax)

- 279.90 Euro (incl. case)

PRICES (incl. tax)

- 333.08 Euro (incl. case)

ITEM NUMBER

- HS 180 incl. case: 000HS18K1

The knife can be exchanged with the use of screws quick and easily.

The hand cutter is equipped with a practical hanging construction.

A plastic case protects the cutter during transport.
